- **Full Documentation:** [See complete docs]

📡 Endpoints Cheat Sheet

Method	Endpoint	Description
GET	`/api.php`	Get all events
GET	`/api.php?id=1`	Get event by ID
GET	`/api.php?date=2025-11-15`	Get events by date
GET	`/api.php?date_from=...&date_to=...`	Get events by date range
GET	`/api.php?status=upcoming`	Get events by status
GET	`/api.php?stats=1`	Get statistics
POST	`/api.php`	Create new event
PUT	`/api.php?id=1`	Update event
DELETE	`/api.php?id=1`	Delete event

💻 Quick cURL Commands

Get All Events

```bash
curl http://104.248.153.158/event-api/api.php
```

Get by Date

```bash
curl "http://104.248.153.158/event-api/api.php?date=2025-11-15"
```

Create Event

```bash
curl -X POST http://104.248.153.158/event-api/api.php \
-H "Content-Type: application/json" \
-d '{
  "title": "Workshop React",
  "date": "2025-12-01",
  "time": "14:00:00",
  "location": "Tech Hub Jakarta",
  "description": "Belajar React",
  "capacity": 50,
  "status": "upcoming"
}'
```

Update Event

```bash
curl -X PUT "http://104.248.153.158/event-api/api.php?id=1" \
-H "Content-Type: application/json" \
-d '{"title":"Updated Title","date":"2025-12-01","time":"10:00:00","location":"New Location","status":"upcoming"}'
```

Delete Event

```bash
curl -X DELETE "http://104.248.153.158/event-api/api.php?id=1"
```

📝 Required Fields

```json
{
  "title": "string (max 255)",
  "date": "YYYY-MM-DD",
  "time": "HH:MM:SS",
  "location": "string (max 255)",
  "status": "upcoming|ongoing|completed|cancelled"
}
```

Optional: `description` (text), `capacity` (integer)

🎨 Status Values

Status	Label	Description
upcoming	Akan Datang	Event belum dimulai
ongoing	Berlangsung	Event sedang berlangsung
completed	Selesai	Event sudah selesai
cancelled	Dibatalkan	Event dibatalkan

📱 Mobile Integration

Android (Kotlin)

```kotlin
private val API_URL = "http://104.248.153.158/event-api/api.php"
```

iOS (Swift)

```swift
let apiURL = "http://104.248.153.158/event-api/api.php"
```

🌐 Web Integration

JavaScript

```javascript
```

```javascript
const API = 'http://104.248.153.158/event-api/api.php';

// Get events
fetch(API)
  .then(res => res.json())
  .then(data => console.log(data.data));

// Get by date
fetch(`${API}?date=2025-11-15`)
  .then(res => res.json())
  .then(data => console.log(data.data));
```

jQuery

```javascript
$.get('http://104.248.153.158/event-api/api.php', function(data) {
  console.log(data.data);
});
```

Axios

```javascript
axios.get('http://104.248.153.158/event-api/api.php')
  .then(response => console.log(response.data.data));
```

⚡ Response Format

Success Response

```json
{
  "status": 200,
  "message": "Success message",
  "data": { /* data object or array */ },
  "timestamp": "2025-10-29 15:30:00"
}
```

Error Response

```json
{
  "status": 400,
  "message": "Error message",
  "data": null,
  "timestamp": "2025-10-29 15:30:00"
}
```

🔍 Filter Examples

By Status

```
?status=upcoming
```

By Date

```
?date=2025-11-15
```

By Date Range

```
?date_from=2025-11-01&date_to=2025-11-30
```

Combined Filters

```
?status=upcoming&date_from=2025-11-01&date_to=2025-11-30
```

📊 Statistics Response

json

```
{
  "status": 200,
  "data": {
    "total": "15",
    "upcoming": "8",
    "ongoing": "2",
    "completed": "4",
    "cancelled": "1"
  }
}
```

🚨 Common Errors

Error	Solution
400 Bad Request	Check required fields
404 Not Found	Verify event ID exists
405 Method Not Allowed	Check HTTP method
500 Server Error	Contact administrator

💡 Pro Tips

1. **Always validate input** before sending to API
2. **Handle errors gracefully** in your app
3. **Use date format** YYYY-MM-DD consistently
4. **Test in Web Tester** before implementing
5. **Check response status** before using data

🧪 Test It Now!

Open Web Tester: **http://104.248.153.158/event-api/tester.html**

Try:

1. Click "Semua Event" to see all events
2. Select a date and click "Cari Event"
3. Create a new event using the form

4. Check statistics

📞 Need Help?

- **Test Interface:** http://104.248.153.158/event-api/tester.html
- **Full Documentation:** Available in main docs
- **Support:** Contact system administrator

Quick Start: Copy the base URL, replace IP if needed, and start making requests! 🚀
